Election/Restrictions

Page 2

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 10-12, drawn to a fuel tank fueling device, classified in class 220, subclass 303.

Claims 24, drawn to a tethering mechanism, classified in class 220, subclass
 375.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions of Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I (drawn to a fuel tank fueling device) has separate utility such as a closure for a radiator. See MPEP § 806.05(d).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robin A. Hylton whose telephone number is 571/272-4540. The examiner can normally be reached on Monday-Friday 9:00 am 4:00 pm.
